

AMENDMENTS TO THE ABSTRACT

Please replace the current abstract with the replacement abstract provided herein on a separate sheet.

ABSTRACT

There is provided an An information processing device and method for realizing performing interactive viewing in which a plurality of users thereof of a shared image, share an image, and wherein an operation performed on the image by any a user among the plurality of users is shown in real-time real-time on the image viewed by another user. The method includes A plurality of information processing devices (2) and (3) belonging to a same group respectively transmit transmitting, to a server (4), image information respectively stored in the information processing devices (2) and (3). The server (4) collects and manages images transmitted from the plurality of information processing devices (2) and (3), and concurrently transmits, to the plurality of information processing devices (2) and (3), a shared image in accordance with an image operation requested from any of the information processing devices (2) and (3). The information processing devices (2) and (3) receive the shared image transmitted from the server (4), and display the shared image on the their respective display sections (26) and (36), respectively.
